EMERGENCY MANAGEMENT PROGRAM

## Site-Specific Sampling Plan Alteration Form

Project Name: Northport Residential Properties

Site ID: 10SF

Author: Renee Nordeen Company: Ecology & Environment, Inc.

Date Completed: 1/16/2020

Changes from Final SAP (include rationale, decision area, matrices, parameters, equipment, personnel, etc.):

Three composite samples with the highest total lead concentrations collected from residential properties will also be analyzed using toxicity characteristic leaching procedure (TCLP) for lead to determine if the soil will require disposal as a hazardous material. The three samples will be analyzed at the Environmental Protection Agency Region 10 Manchester Environmental Laboratory. Standard 8-week turnaround time is requested. No preliminary results are requested.

Samples to be analyzed:

- 19434051;
- 19434054; and
- 19434055.
